This simple book is meant to give you a first start in programming.

The title says it is the hard way to learn to write

code but itâ€™s actually not. Itâ€™s the â€œhardâ€ way only in that itâ€™s the way people used to teach things. In this book you will do something incredibly simple that all programmers actually do to learn a language:

1. Go through each exercise.
2. Type in each sample exactly.
3. Make it run.

Thatâ€™s it. This will be very difficult at first, but stick with it. If you go through this book, and do each exercise for 1-2 hours a night, then youâ€™ll have a good foundation for moving on to another book. You might not really learn â€œprogrammingâ€ from this book, but you will learn the foundation skills you need to start learning the language.

This bookâ€™s job is to teach you the three most basic essential skills that a beginning programmer needs to know:

Reading And Writing, Attention To Detail, Spotting Differences.
