Steps to Designing Climate-Responsive Architecture Building envelope design varies greatly by geographic area. When designing the envelope of the building, factors such as insulation, vapor barriers, and air barriers will vary radically depending on whether the project is in the cold, snowy north, the hot and humid south or the arid desert. Minimize the building footprint.

Efficient Architectural Design Strategies in Hot Dry Area ... buildings located in Kashan. The buildings are built in cubic forms and architects tried to minimize the ratio of outdoor surfaces of buildings to the space required instead for habitation. Cubic forms helped buildings to have a lower exposure to hot weather factors than more linear forms of building. Vernacular Climate Control in Desert Architecture - AIVC Energy and Buildings, ...
